Profile

As a dedicated and flexible Fullstack Web Developer, I bring a strong work ethic and a track record of success. My biggest achievement lies in my role as a key member of a startup team that integrated a complex graphing system, similar to the functionality of Desmos, into a front-end web browser, showcasing my problem-solving skills. Proficient in Java, Python, Swift, and HCJ, I am poised to contribute my expertise and passion for innovation to your software company.

Education

Computer Science B.S, University of Wisconsin - Madison, Madison
June 2022 — Present
Class of 2025

Employment History

iOS App Developer, Xygos, Madison
June 2023 — Present

- Collaborated closely with a team of four colleagues in a startup environment to conceptualize, develop, and launch an iOS app aimed at enhancing the learning experience for college-level math students.
- Developed a graphing UI utilizing Bezier curves, allowing equations to be plotted and displayed as graphs on the user's device. The UI incorporated the implementation of calculus rules, delivering functionality comparable to renowned platforms like Desmos.
- Exercising strong problem-solving skills to identify and address potential bugs promptly, resulting in the first release of the grapher interface using SwiftUI that offered optimal functionality and comfortable user experience.
- Thriving in the fast-paced and dynamic environment of a startup, exemplifying dedication, adaptability, and effective collaboration with team members.

Development Tools

Git/Github, Visual Studio, VS Code, Eclipse, Xcode, Google Cloud, jGRASP
